2019 Sustainability summary statistics

The content of this Sustainability Summary Statistics sheet was informed by issues considered likely to have material impacts on Inter Pipeline's financial or operating performance, as identified by the Sustainability Accounting Standards Board (SASB), as well as other internationally recognized frameworks, including the Global Reporting Initiative's (GRI) Sustainability Reporting Standards and the Task Force on Climate-related Financial Disclosures (TCFD). The information included here has been subjected to Inter Pipeline's Disclosure Policy and process. Financial information sourced from Inter Pipeline's audited financial statements and greenhouse gas (GHG) emissions information has been subject to a third-party audit verification process, in accordance with ISO 14064-3. Note: We are reporting on data relating to our Canadian Operations.
